Subject: RE: HEA habitat values for ESA consultation
Date: 07/15/2010 09:43 AM

The LWG Executive Committee received Genevieve Angle's email yesterday regarding the HEA habitat values for ESA consultation right before the Executive committee met. Our initial reaction was that we would still like to meet Wednesday July 28th, but we will discuss this again when we meet next week. Therefore, at this time I would like to retain the Wednesday, July 28th meeting date until the LWG has an opportunity to deliberate a response. I will follow up with you next Wednesday afternoon after the Executive Committee meeting.

Please let me know if you have any questions.

Bob

Subject: HEA habitat values for ESA consultation

Jim, Bob, Elizabeth, Tom,

Here is the table of ESA habitat values for LWG to use in the FS. These values will give a good estimate of mitigation costs. A couple of changes made since our last meeting have been incorporated. These are the values we will use (barring any new information) for our consultation on the ROD. Any individual circumstances of particular projects that may change these values slightly will be considered in the consultations for individual projects. The values currently in the table are not negotiable, however if LWG would still like to meet one more time to discuss any other issues the group may have, NMFS is willing to attend the meeting that is currently scheduled for late July. Please let us know.

Genevieve
